SPECIFICATION

Product Name: Methylsulfony Methanne (MSM)

Product Code: N-025

Product Description: Methyl-sulphyl-methane (MSM) is an organic sulphur compound which is a metabolite of dimethyl sulphoxide. MSM is a naturally occurring substance that is found in both plants and animals, and is a potent dietary source of sulphur, which is needed in amino acid and protein synthesis as well as in the formation of connective tissue. Sulphur is also required by the body in keratin formation, production of immunoglobulin as part of the immune system, and catalyzing the metabolic reactions that change food into energy.

Appearance :	White needle crystals
Particle Size	60~80mesh
Assay (Dry):	> 99.5%
Residue On Ignition:	≤0.1%

Product Application:

Methylsulfonylmethane (MSM) has been used for pain and swelling of muscles and joints. It is the latest international human health products, and indispensable to the human body to maintain organic sulfur balance. Also, Medicinal grade of MSM is used for the synthesis of medicine, medicine additives. For regulating gastrointestinal functions, promoting nutrition absorption, arthritis, skin diseases, gastrointestinal diseases, skin care and beauty care functions.

Storage and Transportation: Keep in tightly closed container, stored in a cool, dry, ventilated place. The valid period is 2 years.

Package:

25kg/box
